

Petro Vaselo

The soul of our soil

NEGRU DE PETRO VASELO 2023

GEOGRAPHICAL ASPECTS:

The Fetească Neagră vines grow on gently hilly terrain with a mixed clay and limestone composition. The Cabernet Sauvignon vineyards are laid out on an amphitheater-shaped hillside with southern exposure.

Coordinates: 45°53'38" N; 21°31'15" E
45°50'11" N; 21°35'13" E

Altitude: 167 m above sea level/ 190 m above sea level

Climate: Continental (-15°C in winter; +40°C in summer)

Soil (Fetească Neagră): Clay and limestone

Soil (Cabernet Sauvignon): Slightly acidic, clayey-marshy soil

Annual Rainfall: 600 – 800 mm

VINEYARDS:

Varieties: Fetească Neagră and Cabernet Sauvignon

Soil Management:

- Spring tillage and cultivation of nutrient-rich herbaceous plants to enhance the organic matter in the soil during autumn

Vine Management:

- All vineyard operations are carried out by hand. Phytosanitary treatments follow the principles of organic viticulture.

Training System: Guyot system, with 3,968 plants/ha

Production Yield: 900 ml/plant

WINE CELLAR:

- Hand-harvested grapes.
- Manual selection of grape clusters and berries.
- Fermentation in large wooden barrels (25 hl) for 25 days.
- Malolactic fermentation and aging in the same barrels from 3 up to 6 months.
